WHEN *ENERGY* *EFFICIENCY* MATTERS...

Look for this logo for fans that carry Emerson's Most Energy Efficient Motor - The EcoMotor®

EcoMotor®

HERE'S HOW...

- Up to 3 times more efficient than typical ceiling fan motors - costs less than 1¢ per hour to run.

- Uses a maximum of 33 watts of energy

- Drives higher degree blade pitch more efficiently

- Built-in electronics with 6-speed control with every fan

- EcoMotor fans which are also part of our Blade Select Series are adaptable to 42/44", 52/54", 58/60" or 70/72" fan diameter without adding noise, allowing versatility & quiet operation*

Emerson EcoMotor®

* Some blade restrictions apply. Please refer to individual product pages for more information.

WHEN *POWER* MATTERS...

Look for this logo for fans that carry Emerson's Excellent Power & Performance Motor - The K55XL

K55XL
MOTOR

The Emerson K55XL...

- The largest steel ball bearings found in the ceiling fan industry ensure quiet operation

- Thick motor laminations & over 2200 feet of quality copper wiring for optimal performance & longevity

- The silent rubber hub works as a shock absorber to isolate the blades & eliminate noise transmission

- The K55XL Silent Rubber Hub is an Emerson patented flywheel which plays a major role in the overall superior performance of our fans which feature the K55 by absorbing and eliminating noise transmission

Emerson K55XL Motor

HOW WE TEST AIR FLOW

Every fan manufacturer is required to test fans in exactly the same way. The CFM derived from the test are what is printed on every fan carton and in every catalog. CFM stands for Cubic Feet per Minute. This is what the user feels when beneath the fan. CFM is an objective approach to making competitive comparisons.

Energy Information at High Speed

Airflow	Electricity Use	Airflow Efficiency
5658	90	63
Cubic Feet Per Minute	Watts (Excludes Lights)	Cubic Feet Per Minute Per Watt

The higher the number, the more air moved

Energy consumption

Energy Efficiency of air being moved

60" diameter hollow test chamber positioned 6" below fan being tested

32 Sensors measure airflow 100 times over the course of 30 minutes
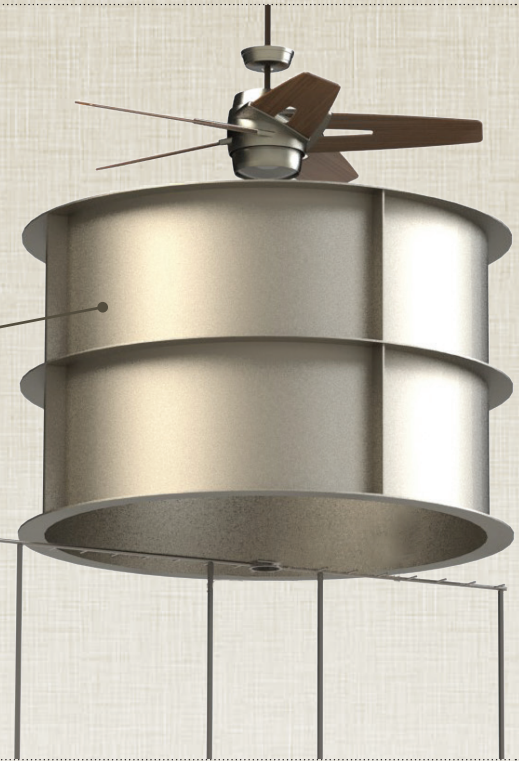

Blade pitch, RPM (revolutions per minute), blade length and overall design are used to maximize CFM. CFM is the true measure of air flow.

HOW WE TEST SOUND

Every new fan model is rigorously tested in the sound lab at Emerson Headquarters in St. Louis, MO. The sound lab is outfitted with anechoic foam wedges which reduce noise by scattering and deflecting sound waves and eliminating bounce-back sounds such as echo, feedback and resonance. This allows our Quality Assurance team to approve only the quietest fan models for production.

HIGHER MOTOR STANDARDS

Emerson vs. Typical Retail:

Quieter
- higher quality bearings
- stricter sound testing criteria
- flatter laminations to prevent motor buzz noise

Lifetime Motor Warranty
- higher grade materials
- precision-machined motor endshields
- more quality checkpoints for defect-free motors

Transitional *(adj.)*

a style that provides an array of ceiling fan designs. While some boast a more traditional heritage, others are influenced with modern lines.

4 SPEED CONTROLS WITH RECEIVERS

3 Upgrade Bundles Available:

UB100
• Includes the SR600 control, AL100 accent light & RC188 Receiver

UB200
• Includes the SW605 control, AL100 accent light & RC188 Receiver

UB300
• Includes the SR650 control, AL100 accent light & RC188 Receiver

Adaptable to Prima (CF901), Avant Eco (CF921), Highgrove (CF990) & Penbrooke Select (CF5100)

SR400
Four-Speed Remote Control with Receiver
• Four fan speeds
• Full range light dimmer with incandescent bulbs (250 Watts max)
• Canopy mount receiver included (Not for use on sloped ceilings)
• Operates from up to 30 ft.
• 1.0 amp fan load
• Non-reversing
• One-year limited warranty
• Two AAA batteries included
• Remote Only: SR401

SW405
Four-Speed Wall Control with Receiver
• Four fan speeds
• Full range light dimmer with incandescent bulbs (250 Watts max)
• Canopy mount receiver included (Not for use on sloped ceilings)
• Operates from up to 30 ft.
• 1.0 amp fan load
• White, light almond and ivory switch cover plate included
• Non-reversing
• One year limited warranty
• Wall Control Only: SW406

(USE WITH RCFP RECEIVER)

SIX SPEED CONTROLS

SR600
Six-Speed LED Remote Control
• Six fan speeds with LED indicator
• Independent uplight/ downlight operation
• Full range light dimmer with incandescent bulbs
• One-touch reverse
• For use with RC188, RC212 & RCK55 receivers
• Two AAA batteries included

SW605
Six-Speed LED Wall Control
• Six fan speeds with LED indicator
• Full range light dimmer with incandescent bulbs (250 Watts max)
• Independent uplight/ downlight operation
• One-touch reverse
• 1.0 amps fan load
• White, light almond and ivory switch cover plates included
• Canopy mount receiver sold separately
• For use with RC188, RC212 and RCK55 receivers

SR650
Six-Speed 2-in-1 LED Remote Control
• Six fan speeds with LED indicator
• Independent uplight/ downlight operation
• Full range light dimmer with incandescent bulbs
• One-touch reverse
• Can be used mounted on the wall or as a remote control
• Single & Dual-gang decorative plate included
• Canopy mount receiver sold separately
• For use with RC188, RC212 and RCK55 receivers
• Two CR2032 batteries included

SR650 Shown in dual-gang decorative plate (Rocker switch not included)

(USE WITH RC188, RC212 & RCK55 RECEIVERS)

RECEIVERS

RCFP

Flat Pack Receiver
- Canopy mount receiver
- Full range light dimmer (250 Watts max)
- 1.0 amp fan load
- Non-sloped ceiling mount only
- For use with SR401 and SW406 controls

RC188

Horseshoe Receiver
- Six fan speeds
- Reverse module
- Independent uplight/ downlight operation
- Full range light dimmer (500 Watts max total, 300 Watts down and 200 Watts uplight)
- 1.0 amp fan load
- For use with 188mm motor fan models
- Designed for SR600, SW605, and SR650 controls

RC212

Horseshoe Receiver
- Six fan speeds
- Reverse module
- Independent uplight/ downlight operation
- Full range light dimmer (500 Watts max total, 300 Watts down and 200 Watts uplight)
- 1.0 amp fan load
- For use with 212mm motor fan models
- Designed for SR600, SW605, and SR650 controls

RCK55

Horseshoe Receiver
- Six fan speeds
- Reverse module
- Independent uplight/ downlight operation
- Full range light dimmer (500 Watts max total, 300 Watts down and 200 Watts uplight)
- 1.0 amp fan load
- For use with Emerson K55XL motor fan models
- Designed for SR600, SW605 and SR650 controls

KNOBS & SLIDE CONTROLS

SW46W (White)
SW46LA (Almond)

- Fan control only
- 2-wire installation
- 4 fan speeds
- 1.2 amps maximum
- Decorative faceplate included
- Please note setting:
  1 High   2 Med-High
  3 Med-Low   4 Low

SW90W (White)
SW90LA (Almond)
Dual Slide Control
- Fan & light control
- 3-wire installation
- 4 fan speeds
- Continuous light dimming (300 Watts max.)
- 1.25 amps fan load
- Decorative faceplate included
- Please note setting:
  1 High   2 Med-High
  3 Med-Low   4 Low

SW93
2-Fan Control
- Fan control only
- 2-wire installation
- 3 fan speeds
- 3 amps maximum
- Faceplate not included
- White and almond knobs included
- Please note setting:
  1 High   2 Med-High
  3 Med-Low   4 Low

SW95
4-Speed Fan Knob Control
- Fan control only
- 2-wire installation
- 4 fan speeds
- 1.5 amps maximum
- Faceplate not included
- White and Almond knobs included
- Please note setting:
  1 High   2 Med-High
  3 Med-Low   4 Low

WW - Appliance White

ACCESSORY DOWNRODS		
Model	**Finish**	**Description**
CFDR25[1]	XXX	2.5" Downrod
CFDR1	XXX	12" Downrod
CFDR18	XXX	18" Downrod
CFDR2	XXX	24" Downrod
CFDR3	XXX	36" Downrod
CFDR4	XXX	48" Downrod
CFDR5	XXX	60" Downrod
CFDR70	XXX	70" Downrod

Complete catalog number by adding the finish code to the model number

SW - Satin White

AW - Summer White

AP - Antique Pewter

BS - Brushed Steel

VS - Vintage Steel

AB - Antique Brass

ORB - Oil Rubbed Bronze

GBZ - Gilded Bronze

DBZ - Distressed Bronze

VNB - Venetian Bronze

GES - Golden Espresso

BQ - Barbeque Black

Patented Sloped Ceiling Kit

- **CFSCKXXX** - SLOPED CEILING KIT (Up to 45°)
  - For use on cathedral and sloped ceilings up to 45°
  - Features a screw-in safety strap to lock the hanger ball in place
  - Complete catalog number by adding the finish code to the model number and order the downrod in the desired length

  Shown in WW. Also available in AB, AP, AW, BQ, BS, DBZ, GBZ, GES, ORB, SW, VNB and VS
  For use with horseshoe receivers: RC188, RC212 & RCK55

  <u>Note</u>: *Our standard hanging system can be used for sloped ceilings up to 26° and 5/12 pitch ceiling.*

Close-To-The-Ceiling Downrod

- **CFDR25** - CLOSE-TO-THE-CEILING DOWNRODS
  - 2½" downrod allows fan to be installed closer to the ceiling

  (In most instances you will save at least 2" of space as you bring your fan closer to the ceiling)

  Shown in WW. Also available in AB, AP, AW, BQ, BS, DBZ, GBZ, GES, ORB, SW, VNB, and VS

- **CFDC** - DOWNROD COUPLER
  - Connect 2 or more downrods for taller ceiling applications.

  Shown in BS. Also available in AB, AP, AW, BQ, BS, DBZ, GBZ, GES, ORB, SW, VNB, VS and WW

[1] Only certain fan models comply with the 2½" downrod. Please see pg. 158-161 for compatible models.

CHOOSE THE RIGHT FAN TO FIT YOUR ROOM

To maximize performance, choose the right fan size for your room. For long or large rooms, consider more than one fan to handle your cooling requirements. For maximum comfort, the fan should be placed as close to the center of the room as possible and blade tips should be at least 18 inches from any wall.

Emerson's Recommendations
Based on aesthetic & airflow considerations

Room Size	Sq. Ft.	Blade Span
Small	0-75	36
Small to Medium	76-144	42-44
Medium	144-225	52-54
Large	225-400	54-72
Great Rooms	400+	52-72 more than one fan installation

Energy Star Recommendations
Based on energy efficiency considerations

Room Size	Sq. Ft.	Blade Span
Small	0-75	29-36
Small to Medium	76-144	36-42
Medium	144-225	44
Large	225-400	50-54

INSTALLATION INFORMATION
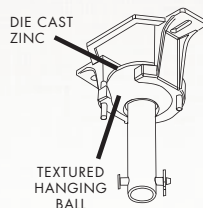

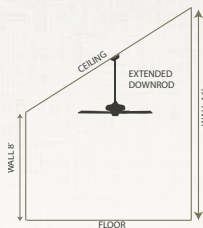

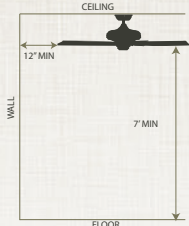

- **STANDARD 8 FOOT CEILINGS**
  - Most Emerson fans are designed to fit a standard eight-foot ceiling, which puts the blades seven feet from the floor for the best air movement and clearance.

- **CEILINGS LOWER THAN 8 FEET**
  - Choose an Emerson Snugger model to achieve the desired seven-foot blade clearance or consider a close-to-the-ceiling downrod (CFDR25). See pg. 158-160 for model compatibility.

- **CEILINGS ABOVE 8 FEET**
  - The fan should be hung by a downrod eight or nine feet from the floor which optimizes air movement. If necessary, order accessory downrod to achieve proper length. See Accessory Downrod chart at the top of pg. 156.

- **HANGING SYSTEM**
  - All Emerson residential ceiling fans feature a die-cast zinc hanging ball and bracket for durability. This system is textured to minimize wobble and provide superior stability. Emerson heat fans feature a J-hook hanging system for easy installation and smooth performance.

- **WARRANTY**
  - All Emerson fans, except Industrial Fans, carry a limited lifetime motor warranty.
